
Study Buddy

Team: Aidan Jiang, Tanishq Saria, Alex Driscoll, Krish Arekar, Sai Atluri

Manager: Preston O'Connor

Description

UMass students do not have a centralized place to find other people to study with or get help. Study buddy helps students study by allowing features for students to make posts, check LRC schedule, form study groups, and upload notes.

Use Cases

Login

Creating Posts

Forming Groups

Adding LRC availability

Resource Section

Use Case 1

Study Buddy

A UMass Amherst student wants to find study partners for their courses. They open up StudyBuddy and see the login page.

The student enters their UMass credentials to authenticate (will try to integrate UMass SSO for authentication eventually). The system verifies them against the database and, upon successful authentication, redirects them to the main dashboard

Here they can view active study posts, create new posts, and access their profile.

If authentication fails, the system displays an error message and allows the student to retry or reset their password.

If the user does not have an account they can create a new account as well.

LOGIN

GOAL	UMass students can create an account or login to access StudyBuddy's features
PRIMARY ACTOR	UMASS STUDENT
PRECONDITION	Student has a valid UMass email address and is not currently logged in
SUCCESS END CONDITION	New user is able to successfully create an account or an old user is able to login safely
FAILURE END CONDITION	New user is not able to create an account or an old user is not able to login safely and remain on login page

MAIN SUCCESS SCENARIO

1

1. Student navigates into StudyBuddy's login page

2

2. Student sees and fills out the login email and password

3

3. Student clicks the Login button

4

4. System validates details entered against database

5

5. System redirects student to main dashboard

LOGIN

SECONDARY ACTORS	Email Verification Service
TRIGGER	Student tries to press one of the buttons on the landing/login page or opens a link that is of a protected page in StudyBuddy
ALTERNATIVE SCENARIO (NO ACCOUNT) (HAS TO MAKE AN ACCOUNT)	1. Student clicks sign up and is redirected to the fields and form to sign up 2. Student enters all the details 3. System checks if email already exists and student enters password 4. System verifies password after the User taps on “Create Account” 5. System sends a verification email to the users account 6. Once user verifies the User is redirected to the Main Dashboard

After a user has successfully logged in and made profile, user can go ahead and make a post. The user will hit create post and enter what they want the message to be and if they want to post it to everyone or the group. After posting, users should see post in their feed along with other posts that reach there feed.

Use Case 2: Make a Post

Use Case

Goal	User can make a post about a subject they want to study
Primary Actor	Student (User)
Precondition	User has an account that is created and is logged in
Success End Condition	User makes successful posts on Study Buddies that others can view
Failure End Condition	The user is not able to post on Study Buddies or cannot view other posts
Secondary Actors	Users who are looking to study the same subject
Trigger	User selects post from dashboard

Main Success Scenario

1. User navigates to posts
2. User selects make post
3. User chooses to post to everyone or to already formed study group
4. System opens post box for user to type in too
5. A user makes post about subject they want to study

Variations

- Variations (error scenarios)
  - Posts are not present in categories or feed
  - System does not register the group/category
- Variations (alternative scenarios)
  - User posts in the notes and not the posts
  - User does not fill all the text boxes for the post and is notified to add the required information

Use Case 3
Study Groups

A user logs into their Study Buddy account, creates a post and other students can view the post and request to join the group. The post creator reviews the requests, accepts them, and once accepted, contact information is shared so the group can study together. Once groups are made, study sessions can be set up

Use Case

Goal	Allow students to create study group posts and accept requests from other students to join
Primary Actor	Student (User)
Precondition	User has a Study Buddy account and is logged in
Success End Condition	A study group is formed and contact information is shared between accepted members
Failure End Condition	The user is unable to create a post or manage join requests
Secondary Actors	Students requesting to join the study group
Trigger	A student views a study post and request to join the group

Main Success Scenario

1. User creates a study group post for a specific course
2. Other users view the post
3. Other users send requests to join the group
4. Post creator views incoming requests
5. Post creator accepts a request
6. Contact information is shared between the group members

Variations

error scenarios

User does not fill in all required fields (course name, time, topic) and is prompted to complete them

alternative scenario 1

Post creator rejects a join request

alternative scenario 2

User withdraws their join request

alternative scenario 3

User edits the post details before accepting requests

Use Case 4 - Calendar

A user has made a profile and may have joined some study sessions. They open a calendar tab which lists both their study sessions and LRC resources such as SI sessions and tutoring

Formal Use Case

Goal	Primary Actor	Secondary Actor	Success End Condition	Failure End Condition
Users can view a calendar with study sessions, available SI sessions and tutoring hours from the LRC	Students whom are signed up as users	No secondary actors	User can view all study sessions signed up for, along with LRC resources available to them	User cannot view all study sessions signed up for or LRC resources available to them

Formal Use Case 2

Precondition

User has logged in

Trigger

User navigates to the calendar tab

Main Success Scenario

1. User navigates to calendar tab
2. User views the calendar with the next 30 days worth of study sessions and LRC resources

Formal Use Case 3

Variations (error scenarios)

1. User signed up for study session but it does not show up on the calendar

2. User has classes which the LRC supports but does not see any tutoring or SI sessions

3. User does not have classes which the LRC supports but does see tutoring or SI sessions

Variations (alternative scenarios)

User does not have any study sessions they signed up for or classes which the LRC supports, in which they would view an empty calendar and a warning message notifying them of this

Use Case 5

User 1 and User 2 are logged into Study buddy. User 1 uploads his notes for CS 320 and User 2 is able to view them. User 2 is also able to view other users notes as well.

Formal Use Case

Goal

User 1 can upload resources such as study guides, notes, and cheat sheets and User 2 can view them.

Primary Actor

Students looking to share notes.

Secondary Actor

Students who view the notes

Formal Use Case

- Precondition
  - User 1 and User 2 have accounts and are logged in
- Success End Condition
  - User 1 can uploads files and other User 2 can view them
- Failure End Condition
  - User cannot upload files and other users cannot see them
- Trigger
  - User 1 or User 2 goes to resource tab

Formal Use Case

- Main success scenario
  - User 1 goes to resource tab
  - User 1 uploads notes
  - User 2 views notes

- Variations (error scenarios)
  - User 1 uploads notes but User 2 cannot view them
  - User 1 or User 2 is unable to go to the resource tab

- Variations (alternative scenarios)
  - User 1 does not actually uploads notes
  - User 2 enters incorrect category for notes

Thank You
